## Summary

With experience building full-stack web applications, I bring a solid understanding of modern JavaScript ecosystems, performance, and clean architecture.

My expertise includes Vue, React, Node, TypeScript, and MongoDB.

A highlight of my work has been developing complete platforms from the ground up perfect Lighthouse and accessibility results.

## Experience

### Frontend Developer at [Digitalando](#)

05/2025 - 10/2025

- Built key features for a community platform connecting companies and software developers, using React and RESTful APIs.
- Implemented fast search, multilingual UI, and payment functionality, ensuring responsive performance across the app.
- Contributed to an agile team by delivering well-tested components and improving overall usability and workflow consistency.

### Full-Stack Developer at [Biglo](#)

08/2023 - 04/2025

- Developed a full B2B logistics platform end to end using Vue, Node, TypeScript, MongoDB, and Tailwind.
- Achieved perfect Lighthouse scores and zero accessibility issues through performance optimizations and strict standards compliance.
- Designed and implemented all major features –frontend and backend– delivering a robust, scalable system with a smooth user experience.

## Education

### Higher National Diploma in Web Application Development

at CIP FP Batoi

09/2021 - 06/2022

### Higher National Diploma in Multi-Platform Application Development

at CIP FP Batoi

09/2019 - 06/2021

## Skills

### Frontend:

- Vue
- React
- JavaScript
- TypeScript
- HTML5 & CSS3

### Backend:

- Node
- RESTful APIs
- MongoDB

### Additional:

- Docker
- Accessibility
- SEO
- UX
- Trello
- Git

## Languages

### English:

C2 (Cambridge CPE)

### Spanish:
